

## Letter to Prime Minister Boris Johnson

18<sup>th</sup> February 2021

Dear Prime Minister Boris Johnson,

I'm writing to you to help you make informed decisions regarding ending the COVID lockdown for good.

Let's get it right, work with me to make high accuracy COVID PCR testing available and more affordable for the community.

I have presented you with the technology through Medic Cities, providing accurate PCR testing, detecting low levels of the virus and 99.9% accuracy, in only 40 minutes. This will provide accurate results to ensure limited deaths and spread of the virus.

Lateral flow and rapid test will be fatal for thousands, not detecting those with low levels that are highly contagious and will spread the virus, which will result in more lockdowns.

Get this done right Prime Minister.

Let's Bring London Back.

Sincerely,

Farah London  
Mayor of London 2021  
Independent Candidate

## BRING LONDON BACK
